WELCOME TO THE FUTURE OF PLAY

Build-It-Yourself STEM Toys helping children unlock their true potential with the power of play.

Smartivity is an award-winning, internationally acclaimed toy designing laboratory and manufacturer from India. Founded in the year 2015 by three friends graduating out of **IIT-Delhi - Apoorv Gupta, Rajat Jain & Ashwini Kumar** - it all began with a vision to offer children meaningful toys that actually make a difference in their lives. Today, Smartivity is a premier STEM toy brand helping children learn essential skills in their foundational years and setting them up for a bright future.

Come, partner with us as we build the future generation of changemakers!

Smartivity® Pinball

\$17.50

Discover arcade-style fun with Smartivity! With this kit, your child will build a Pinball Machine and control the ball using the snappy flippers. Make sure that the ball doesn't get consumed by the 'Gravity Field'! Hit the 'Poppers' to make them fly and try to get the highest score by freeing the balls in Vaults A and B. The kit comes with easy-to-follow instructions, STEM concept explanations, and experiments that your child can do independently.

Mechanical Hand

Have you ever wanted a robotic hand of your own? In this kit, your child will build a Mechanical Hand. Your child will then wear it and control its fingers just like the fingers in your hands. For endless play, we have included blocks of different shapes, along with challenges. Stack the blocks by picking up each block one by one. Simple step-by-step instructions, STEM concept explanations, and experiments are included for independent play.
